10. The following table shows the results of the survey on the use of the Internet for learning English. The table shows that the majority of students use the Internet for learning English.

Age Group	Percentage of Students
18-20	75%
21-23	60%
24-26	45%
27-30	30%

The results show that the use of the Internet for learning English is most popular among the youngest students. This is likely due to their familiarity with technology and the Internet.

11. The following table shows the results of the survey on the use of the Internet for learning English. The table shows that the majority of students use the Internet for learning English.

Gender	Percentage of Students
Male	65%
Female	55%

The results show that the use of the Internet for learning English is popular among both male and female students. However, the percentage of male students who use the Internet for learning English is slightly higher than that of female students.

12. The following table shows the results of the survey on the use of the Internet for learning English. The table shows that the majority of students use the Internet for learning English.

Subject	Percentage of Students
English	80%
Mathematics	50%
Science	40%
History	35%

The results show that the use of the Internet for learning English is most popular among students who are studying English. This is likely due to the fact that English is the primary language used for learning on the Internet.
